Piloting plan

Our piloting plan will consist of:

- Creating a user manual with implemented core functions about our application so that pilot users may know what actions they can do in it. This manual can contain pictures or links to videos to explain its use.
- Creating a test case suite for pilot users to execute it.
- Creating a form in order to know users' opinions and get feedback to improve our product.

Test case suite

Not logged user

- List and search public capsules
- Display public capsules

Free capsules

- Create a free capsule and publish it into our website.
- Display a free capsule created by the user.
- Delete a free capsule created by the user.
- Update free capsule

Premium capsules

- Create a private capsule
- Create a premium capsule with an active deadman switch
- Refresh a premium capsule with an active deadman switch
- Create a modular capsule with modules and distinct release dates
- Display a released module.
- Edit capsule
- Edit module
- Delete module

Important dates

Date	Description	Person
